Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Thursday 02 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy start, with hill fog. Sunny spells developing, especially inland.

Today:
Cloudy start, especially across the Pennines with some hill fog, but also a few brighter spells. Cloud thinning more readily than on Wednesday, with sunny spells developing by the afternoon. Many coastal areas likely staying rather cloudy however. Maximum temperature 17 deg C (63 deg F).

Tonight:
Clear spells at first, leading to a rather chilly feel inland, however cloud likely spreading westwards and thickening overnight. Mostly dry, but perhaps the odd spot of drizzle by dawn. Minimum temperature 7 deg C (45 deg F).

Friday:
Another cloudy start for many, before brighter or warm sunny intervals develop. The best of these will again be across western parts with some eastern areas remaining dull. Maximum temperature 19 deg C (66 deg F).

Outlook for Saturday to Monday:
Cloudy start with drizzle possible Saturday, then dry with sunny spells. Winds strengthening Sunday, staying dry with warm sunny spells. Low confidence Monday, but likely dry, breezy, with sunny spells.
